Purpose

To outline Wildland Consultants Ltd (Wildlands) commitment to the protection of the environment.

Policy

Wildlands is committed to the protection of the environment, minimising our environmental footprint, and adverse effects. The environmental efficiency of our operations has been honed to the extent that we act as a working example of an environmentally-friendly carbon-neutral consultancy, through actions such as:

- Identify our environmental impacts and establishing objectives and targets for continual improvement.
- Ongoing review and improvement of our environmental management system to assist in meeting our objectives and retaining our Toitū diamond certification.
- Maintain our zero carbon certification through minimising the use and waste of materials, organic waste, and electrical energy, and encouraging energy-efficient driving practices.
- Reduce waste through re-use, recycling, use of renewable products, and buying second-hand products, where alternatives are available, economical and/or suitable.
- Promote our environmental policy's principles when procuring goods and services.
- Adopt and implement sustainable business practices to prevent damage to the environment that could potentially be caused by our operations.
- Encourage and support suppliers and sub-contractors to achieve similar high environmental standards.
- Provide adequate training and support so our staff comply with the relevant legislation, codes of practice, and our Wildlands Policies.
- Comply with all relevant statutory consents, local and regional government bylaws, and relevant environmental legislation and regulations.
- Promote awareness of our environmental management system and Environmental Policy, and encouraging the support of our environmental principles.
